

### C3 – Individuals living in income poverty

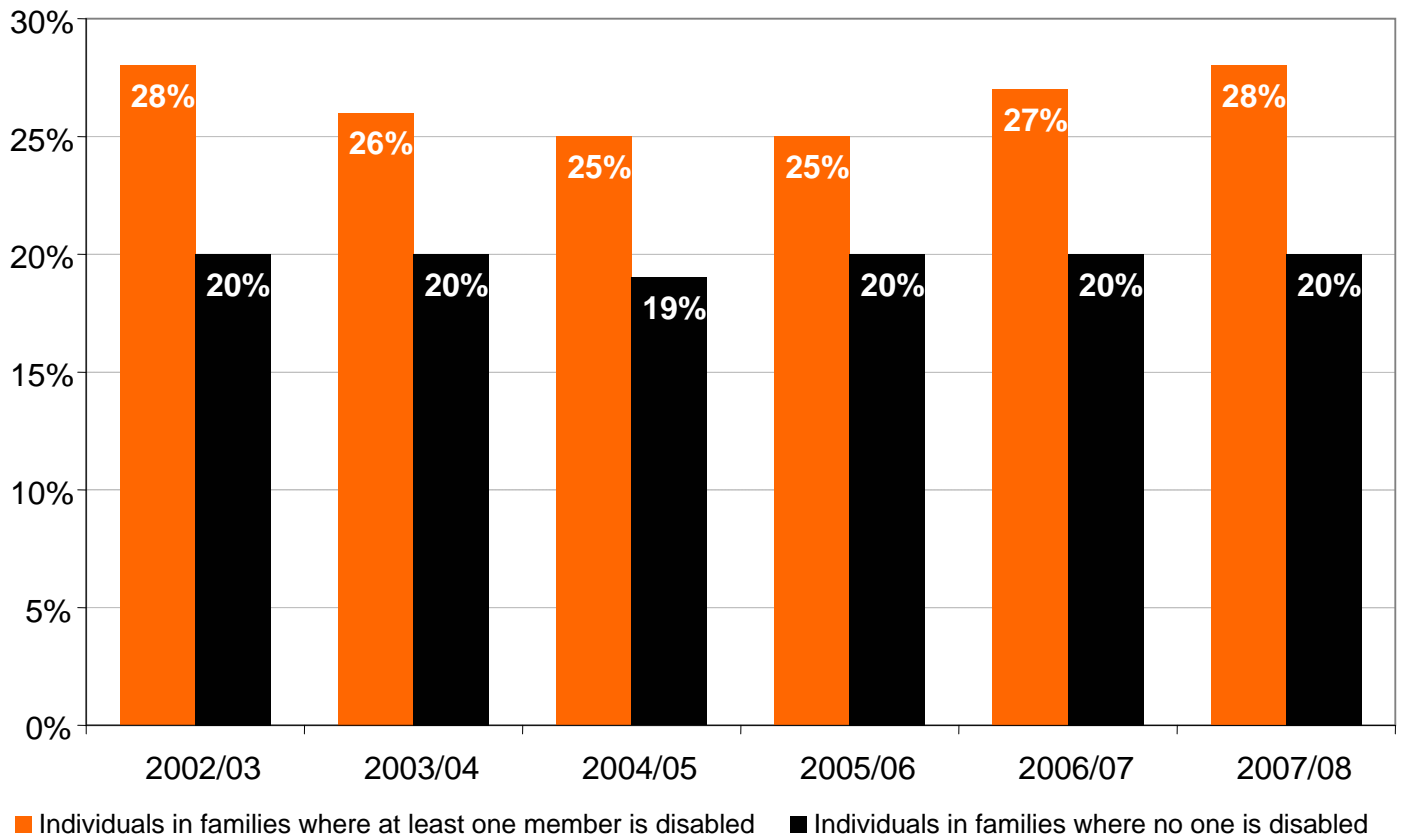

**Baseline and Trends:** Baseline year – 2004/05. Both before and after taking into consideration housing costs, there have been significant increases between 2004/05 and 2007/08 in the percentage of individuals living in income poverty in families where at least one member is disabled and in the percentage of individuals living in income poverty in families where no-one is disabled.

Both before and after taking into consideration housing costs, the risk of low income for individuals is significantly higher in households where at least one member is disabled than households where no-one is disabled.

#### Individuals living below 60% median equivalised household income before housing costs

## Individuals living below 60% median equivalised household income after housing costs

**Definition:** People with disabilities are defined as respondents who report a limiting long standing illness, impairment or disability. Everyone in this group would meet the definition of disability in the Disability Discrimination Act (DDA); however, these estimates do not reflect the total number of people covered by the DDA as the FRS does not collect this information. Data is for United Kingdom.
