

### F3 –Households with access to the internet

**Baseline and Trends:** Baseline year – 2005. Between 2005 and 2006, the proportion of households with access to the internet has

- remained stable at 49% amongst households where someone is disabled
- increased from 66.8% to 71% amongst households where no one is disabled

The gap between disabled and non disabled households has widened from 17.9% in 2005 to 21.9% in 2006.

#### Households with access to the internet

**Definition:** Disabled respondents are those with a long-standing illness. Internet access is determined by the survey respondent answering the question ‘does anyone in the household have access to the internet?’.

**Note:** The survey question used to identify disabled people has seen some revisions from 2005 to 2006. Previously published figures have seen revisions since the last annual report.
